Play, Learn & Grow Program Descriptions

Little Counters - This is a play-based program for parents and caregivers with children 18 to 39 months. Families will play, sing and do activities together to understand and build mathematical concepts. Pre-registration required.

Movin' and Groovin' – Join us for a fun and interactive music program where we will learn new songs, play with instruments, and find ways to move our bodies.

Cooking with Kids – Join us for a fun learning experience while making your own food item to eat or take home. Together we will practice many early literacy and numeracy skills and fine motor skills while we stir, cut, and create.

Exploring Science – Join us as the children experience the wonder of science while trying new skills and finding out about the world around them.

Baby Wearing Dance – You've seen the baby wearing dance classes and flash mobs videos online, now you can dance with your baby too! Join us for Baby and Me Baby Wearing Dance to get moving, bond with your baby, and meet other local moms. Bring your baby and your favorite wrap or carrier.

Storytime with the Librarian – Our local librarians will visit each location to meet all of our families and share a together time experience with us. For more information on Middlesex County Library visit <https://library.middlesex.ca>

Healthy Start Infant Drop-In – Speak to a public health nurse about your baby. For more info visit <https://www.healthunit.com>

Play & Learn – is a drop in program full of activities for children 0-6 years and their parent/caregiver. Learn and have fun together with your child exploring a variety of creative opportunities for learning through exploration, play and inquiry. This program uses a play based learning approach.

Baby Time – is a drop in for babies 0 to 12 months and their parent/caregiver. Siblings are welcome. Meet other parents and share in parenting topics, brain games, singing and circle time with your children.

Just Beginnings – This is a FREE 4 week program for first time Moms with a baby 0 - 7 months of age. We will talk about things like how babies grow, learn and play, sleep, crying and feeding.

Baby Games – Current research affirms the importance of stimulating babies brains to help 'pave those highways' and make permanent connections for future learning and development. All games will encourage healthy brain development, improve listening and language skills, spark curiosity, increase awareness of their body, and develop a sense of humor.

Bubbles and Babies – Bubbles are an activity for you and your child to do together. We will discuss the importance of bubbles, learn new songs to sing while using bubbles, and you will get to take some bubbles home with you.

For more information visit www.middlesex.ca/earlyon.
